

## President Mission Support and Test Services LLC **Mark W. Martinez**

As the President of Mission Support and Test Services LLC (MSTS),

Mark Martinez provides leadership and management direction for the safe, secure, effective and efficient execution of all operations at the Nevada National Security Site (NNSS) and leads development and execution of a strategic vision for the future.

Mark has more than 30 years of experience

leading and managing complex and multidisciplinary nuclear, technical, business, operational and site service organizations. Prior to joining MSTS in 2017, he spent 23 years at Lawrence Livermore National Laboratory (LLNL), ending his service there as Vice President and Principal Associate Director for Operations and Business, where he implemented key strategic initiatives and operational and infrastructure improvements.

While at LLNL, Mark gained both programmatic and operational expertise through diverse assignments and developed key

relationships with employees and external stakeholders. He was a senior test director responsible for executing LLNL experimental activities at the NNSS which encompassed comprehensive oversight of complex technical; construction; environment, safety and health; quality assurance; security; external communications; and other management functions for large-scale projects. He also served as the Program Leader for the Nuclear Materials Technology Program, the Nevada Experiments and Operations Acting Program Leader, and the Deputy Principal Associate Director in the Weapons & Complex Integration.

Mark has a strong background leading transformations and has devoted personal effort toward solidifying a strong and clear identity and culture for the NNSS. Notable efforts have included initiating a BeyondZero safety culture of looking out for one another with tangible results of driving down injuries and operational upsets. In addition, Mark continues progress toward strengthening the NNSS' identity as a user facility where national laboratory scientists and other national security customers desire to come to do work and has taken steps to improve affordability, risk management, project management and work authorization and control.
