### EXPERIENCE

Stuart MacVean is the President and Chief Executive Officer of Savannah River Nuclear Solutions, LLC (SRNS). He is responsible to the Department of Energy (DOE) for safe, effective and efficient management and operations of the Savannah River Site (SRS). SRS is one of DOE's largest production sites, performing activities ranging from environmental cleanup and protection, to nuclear materials storage and disposition, including operation of the only U.S. tritium plant and the Savannah River National Laboratory. His responsibilities include providing vision, leadership, mission growth, technological advancement, and a performance-based culture of safety, security and operational excellence at the Site.

MacVean has more than 35 years of experience working in the DOE complex. Prior to joining SRNS, MacVean served as a vice president of Operations for Fluor Government Group's Environmental and Nuclear business line. Prior to joining Fluor, MacVean was President and Project Manager at Savannah River Remediation LLC and also served as Executive Director for Spent Fuel Management at the Sellafield site in the United Kingdom.

MacVean currently serves on a number of community boards focused on improving health, education and economic development in the region.
